

Jenn Ferguson

Highly motivated and detail-driven engineering student with hands-on experience in CAD-based design, prototype development, manufacturing support, and cross-functional engineering collaboration through roles at NASA Glenn Research Center and GE Appliances. Proven ability to quickly learn new technical skills, solve complex problems, and translate engineering concepts into practical design and operational improvements.

EDUCATION

University of Louisville

*Bachelor of Science, Major in Chemical Engineering, Minor in Sustainability,
Minor in Management*

Aug 2023 — May 2027

Completed Courses: Strategy of Design, Plant Process and Product Design, Thermodynamics, Fluid Dynamics, Materials Science, Heat/Mass Transfer

PROFESSIONAL EXPERIENCE

AME Clothing Care & Finishings Co-Op | GE Appliances, A Haier Company

May 2026 — present

- Conducted root cause analysis of contamination and chemical process issues in finishing operations to optimize coating process
- Investigate testing discrepancies to improve data reliability and control
- Collaborate with designers to assess new hanging rack designs

Environmental Health & Safety Co-Op | GE Appliances, A Haier Company

Aug 2025 — Dec 2025

- Earned Most Impactful Project Award at Co-Op Report Out event
- Self-taught AutoCAD to create and revise technical drawings and layouts
- Designed user-focused labeling and excel tracking systems that improved maintenance cost savings by 74% and time savings by 84%

Drop Tower Experiment and Construction Intern | National Aeronautics and Space Administration (NASA)

Jan 2025 — May 2025

- Independently learned SolidWorks to design hardware and prototypes
- Led an engineering design project team for a 6-week competition, owning the full CAD design and fabricated prototype
- Supported design, fabrication, and testing of a Fluid Flow Loop

CONTACT INFO

Louisville, KY 40208

Jenferg13@gmail.com

SKILLS & ABILITIES

SolidWorks, AutoCAD, technical drawing, prototype development, laser cutting, 3D printing

Microsoft Applications, data analysis, technical documentation, process tracking

Project leadership, quality assurance, cross-functional collaboration

AWARDS

Recognized by supervisors and colleagues for excellent feedback integration and attention to detail.

- **Most Impactful Project Award**, GE Appliances 2025
- **Best Project Design** and **First Place Overall**, NASA 2025
- **First in class of 463** (high school)

CLUBS & ACTIVITIES

Senior Recruitment Representative of Delta Zeta Sorority

Secretary/Co-designer of ChemE Car

Member of SWE and AIChE

PROJECTS

Habitable Lunar Rover; 6-week Team Design Project | NASA Glenn Research Center

- **Led the team as captain**, establishing a detailed project schedule that met scientific milestones and resolved design challenges on time
- Designed the complete moon rover in SolidWorks to meet exact specifications and fabricated the prototype, delivering it for final presentation where we won the design challenge

Prototype Drop Rig Design; CELERE Project | NASA Glenn Research Center

- Self-learned SolidWorks to create two prototype rigs and six different test cells for experimental trials
- Translated CAD concepts into physical prototypes using laser cutting and hands-on assembly
